

LIST OF U.S. CUSTOMS LABORATORY METHODS

USCL NUMBER	METHOD	TITLE
76-01	ASTM E 34	<u>Test Methods for Chemical Analysis of Aluminum and Aluminum-Base Alloys</u>
76-02	ASTM E 101	<u>Test Method for Spectrographic Analysis of Aluminum Alloys by the Point to Plane Technique</u>
76-03	ASTM E 227	<u>Test Method for Optical Emission Spectrometric Analysis of Aluminum and Aluminum Alloys by the Point to Plane Technique</u>

U.S. CUSTOMS LABORATORY METHODS

ASTM E 34
Test Methods for Chemical Analysis of
Aluminum and Aluminum-Base Alloys

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

**1 SCOPE AND FIELD OF
APPLICATION**

These methods cover the chemical analysis of aluminum and aluminum-base alloys. These are among the methods that can be used to determine the composition of aluminum alloy and articles thereof provided for in Chapter 76 of the Harmonized Tariff Schedule of the United States (HTSUS).

Test Method for Optical Emission Spectrometric Analysis of Aluminum and Aluminum Alloys by the Point to Plane Technique

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

This method covers the spectrometric analysis of aluminum and aluminum alloys. This is one of the methods that can be used to determine the composition of aluminum alloy and articles thereof provided for in Chapter 76 of the Harmonized Tariff Schedule of the United States (HTSUS).
